

Looking and feeling good helps us in both our personal and professional lives.

Rather than sheltering away from the world, we can walk with a spring in our step and an air of confidence wherever we go. Being happy and positive also radiates to those around us, so not only do we benefit, but our family, friends and colleagues do as well.

One of the ways in which we can improve on our appearance is through cosmetic surgery. No longer the province of the rich, it is now possible for anyone to enhance their looks or recover their youthfulness. It is, however, never a decision that can be taken lightly and your reasons and expectations should always be well thought-out.

Prague is fast becoming the 'cosmetic capital' of Europe. The Czech Republic has a long tradition of plastic surgery. Professor Francis Burian, a Czech, is regarded as one of the pioneers in the field of plastic surgery. Charles University, Prague was home to Europe's first faculty for plastic surgery, opening in 1920.

With surgeons having to study for their medical degree, then having to practice general surgery first followed by 5 years of plastic surgery you are sure that your surgeon is not only qualified but experienced too.
